# 10<sup>th</sup> International Conference on CONcrete under SEvere Conditions - Environment & Loading

September 25-27, 2024

Two Pre-CONSEC workshops

September 24, 2024

1. C3S - Corrosion Control in Concrete Structure
2. CTSI - Construction Technologies for Sustainable Infrastructure

All at Radisson BLU Hotel GRT Chennai (near airport), Chennai, INDIA

CONSEC conferences focus on the advancements in the areas related to the design, construction, testing, and preservation of various construction materials and systems exposed to severe environmental and loading conditions. Earlier CONSECs were held in Japan (1995), Norway (1998), Canada (2001), South Korea (2004), France (2007), Mexico (2010), China (2013), Italy (2016), and Brazil (2019).

The Centre of Excellence on Technologies for Low-Carbon and Lean Construction (TLC2) and BTCM Group at the Indian Institute of Technology Madras feels proud and privileged to organize the 10th CONSEC in Chennai, India (named as CONSEC24) in association with RILEM, ACI and ICI.

## Themes

- Advanced materials for severe conditions
- Lab/field testing and characterisation
- Repair and strengthening materials and methods
- Damage, deterioration and transport properties
- Service life, reliability, sustainability and resilience
- Special concretes and construction techniques

## Highlights

- 11 Plenary Sessions, 19 Keynote Lectures, 106 Contributory Oral Presentations and 100+ Student Posters
- Learn about the latest development in Concrete Durability from the international experts
- Networking opportunities with 500+ concrete professionals
- Meet Industry experts, Decision makers and Relevant Stakeholders

## Industry Sponsors

Last Date of Registration & Payment: September 15, 2024

Registration Category	Conference Registration fee (including tax)
	Indian (INR)
Student Author	18,000
Individual	30,000
Individual (Discounted) (RILEM/ACI/ICI members)	27,000
Pre-conference workshop attendee only	4000

Register soon

We invite students, faculty members, and practitioners working in the areas of structural engineering and construction materials to attend CONSEC24, C3S & CTSI and make it a huge success.
